

# WORKING TOGETHER

to keep workplaces open  
& safe through Covid-19

Webber Wentzel, WITS Health Consortium, Envision Advisory Services, The Aurum Institute and Aurecon – (soon to be 'Zutari') bring together their unique skill sets to assist businesses to keep doors open and people safe.

Through our deep sector expertise and by offering cost-effective end-to-end solutions, we are helping business manage risk and liability and ensure good corporate governance. We can support clients in South Africa and across the African continent and bring the value of cross-sectoral experience, sculpted for your particular business needs.

We have found incredible bespoke turnkey solutions to help scale and co-ordinate your response.

## WE CAN ASSIST WITH:

**Multidisciplinary and legally privileged legal and tax advisory services,** which include occupational health and safety, POPI, labour, interpretation of statutes and regulations, review of policies and standard operating procedures

**Web and/or mobile based service integrating employee screening** before and at the workplace, visitors and service providers, tracking through the workplace, business intelligence and dashboards, advice on workplace hotspots and ecosystem hotspots

**Clinical and occupational health advice** on site and within the ecosystem, tailored staff training, psycho-social support for employees in isolation and quarantine, clinical support and clinical trials, validation of Covid-19 testing

**Mobile and fixed testing laboratories,** fast processing of tests, operate quarantining and isolation facilities, de-contamination, cleaning, waste management services

**Building plant and facility risk assessment,** procedural gap analysis aligning existing procedures with a Covid-19 specific response, technical engineering and design, construction risk mitigation, planning and rebaselining of Covid-19 affected projects, geographical information systems and master-planning, infrastructure advisory services, waste water and other facility based testing to identify workplace and ecosystem hotspots, communications and data handling
